Project Title: Wimbledon Championships Website

I envision this site to have a combination of photographs and illustrations. It could make sense as either a long page with a progress bar on the left, or split up into multiple pages.

- **Home Page/Introduction:** Introduce the tournament including but not limited to when it is, where it is, and the type of court. Could also include how many players there are and how they are picked.
- **History:** When it first started, notable moments in history, etc.
- **Traditions:** Includes the trophies, all-white outfits, berries and cream, balloting for tickets.
- **Previous Winners:** Should be a table of the previous winners. Could include the prize money, the runner up, or the score of the final match.
- **Sources:** A list of sources used to compile the website.
